SeaGlide Workshop for Educators
Student-Built Underwater Gliders

For Grade 6-12 educators

Saturday, February 11, 2017 - 9 am to 4 pm
UNO Shea Penland Coastal Education and Research Facility
Chef Menteur Pass, New Orleans, LA

Focus: In and out-of-school educators of middle and high-school-aged students.

What are underwater sea gliders and how are they used by scientists to study the ocean and its inhabitants? Come to this workshop for educators and learn how gliders are being used in the Gulf of Mexico. You will build a small-scale underwater SeaGlide of your own, and then take this engaging STEM activity back to your students.

This free workshop will be held at Shea Penland Coast Education and Research Facility (CERF), a field research station for UNO located at Chef Menteur Pass in eastern New Orleans, 30 minutes drive from downtown. Materials, refreshments for breaks and lunch will be provided. Participants will be eligible for a $160.00 stipend.

For more workshop details, please contact dmaygard@uno.edu

Space is limited! Register at https://www.surveymonkey.com/r/MPRV2QK
